Innovation and Insight

“Ultimately, our goal is to improve patient well-being and recovery times through leading edge biomaterial technology”

At BioInteractions, we take pride in developing innovative biocompatible solutions for disposable and implantable devices used in medical procedures and treatments worldwide. Our advanced biomaterials deliver the best biocompatible coatings, which are fast becoming healthcare industry standards:

- **AvertPlus™** Surface Active Antimicrobial Coating
- **Assist™** Enhanced Lubricious Coating
 - **Assist™ UV:** UV-cured technology
 - **Assist™ HC:** Heat-cured technology
- **Evolve™** Combines the advanced dual function antithrombogenic and anti-platelet moiety with antimicrobial functionality
- **Astute®** Advanced Heparin Coating
- **Inhibit™** Biomimetic Non-Fouling Platform
- **Contact Lens Technologies** Biomimetic Non-Fouling Contact Lens and Antimicrobial Contact Lens Care solution

A UK-based company founded in 1991, we have won multiple awards and built a reputation in the medical device world as a company that goes that bit further to fulfil our customers' needs.

BioInteractions excellent facilities include a custom designed production laboratory, enabling effective routine tasking as well as highly sophisticated operation by our team of skilled technicians and scientists.

Key to our success is a vibrant and innovative R&D department, focused on delivering the next generation of cutting edge biomaterials through both in-house projects and collaborative partnerships.

BioInteractions' Key Advantages:

- We are able to assist you in deciding the main focus of the coating requirements for your device and we use the best methods for applying the coating technology
- We are able to meet high-volume production and delivery requirements. We have a history of stable and consistent production with long-term supply and support
- We have the best competitive advantage with an accomplished record of biocompatibility and regulatory approval, using proven and widely accepted biocompatible material technology
- We are experts in technology transfer, and have a history of working with the leading players in the medical device market
- We have a very competitive pricing policy
- We operate to a quality management system that is certified to the ISO 9001 and ISO 13485 quality standards to ensure excellent manufacturing practice. We are able to provide comprehensive technical data and support, which includes all critical/pertinent information on production and comprehensive testing
